What is the Psychiatry of Later Life Team?

- The Psychiatry of later life team provides care for individuals sixty five years and over with significant mental health difficulties in County Clare
- Our team is a multi-disciplinary team which consists of Admin support, a Consultant Psychiatrist, a Senior Registrar Doctor, A Non- Consultant Hospital Doctor, Advanced Nurse Practitioner, Clinical Nurse Specialists, Occupational Therapists and Social Worker

Some of the Services We Provide

- Outpatient Clinics
- Home-visits
- Nursing Home and Hospital Reviews
- Support, Education and Therapeutic groups
- Individual Therapy
- Inpatient Assessments
- Connecting with other HSE services and voluntary organizations

Our Referral Pathway

- Referrals to the Psychiatry of later life team can be made by your G.P. or any medical Doctor involved in your care
- When referred to our team your care will be discussed at our weekly team meeting. A member of our team will make contact with you to arrange an assessment that works best for you

Our Assessments

- Initial assessments may take approximately one hour. You may be invited to a clinic appointment in Gort Glas or a member of our team may visit you at home or where suits you best to discuss any mental health concerns you may have. Family and any loved ones are welcome to be present at this time if this suits you
- It may be helpful to bring to your assessment details of your medical history, mental health history, medication list and details of your G.P., pharmacist and any specialist Doctors involved in your care if these are easily available to you at the time
- Following your assessment, a member of our team will work with you in collaboration with the team to develop an agreed plan of care to meet your needs. The duration of time the team will work with you will be dependent on your care needs
- We will update your G.P. and referring Doctor on the outcome of the assessment and any changes to your plan of care
- We also have a five bedded assessment unit in Ennis Hospital for individuals who require inpatient care

Our Philosophy of Care

Clare Psychiatry of later life aims to deliver a high quality service by fostering therapeutic empowering relationships with older persons, their families and any other significant individuals in their lives. Our multidisciplinary approach is recovery focused and individually tailored to meet the needs of our service users through a culture of mutual respect and person centred values. We establish close links with other HSE services and voluntary organizations in the areas of direct patient care, training, education and health promotion. We continue to grow and develop team skills by reflecting on our practices and evaluating our care standards based on recognised evidence based practice and service user needs.

Supports and Services

In this booklet we have included a list of supports and services available to you to support positive mental health well-being in later life. We hope you find this helpful.
